Agricultural Films

Cadillac Products Packaging Company has been an innovative leader in the development of high barrier films for commercial and military use for over sixty five years. With the help of growers, major universities and applicators we have developed a patent pending VIF high barrier mulch film that gives the best combination of gas barrier and toughness available from any available mulch film.

Our blown film gives us the edge on toughness. Cast films can zipper when cut and exposed to wind, blown films will not zipper. Our patent pending process was developed to have the best balance of properties of any VIF film. It rigs on easily, hugs the bed and has the best barrier to methyl bromide of any VIF film. In addition to VIF film, we make fumigant tarping film in widths to 156".

- Cost effective
 - 3 times the barrier of cast VIF film
- Superior nut grass and nematode control using less gas
- Does not zipper like cast VIF films
 - Less affected by wind and field trash
- Easiest to apply
 - Rigs easily
 - Hugs the bed
 - Tightens after application
- 9+ month field life allows for multiple plantings
- Excellent color saturation
 - Whitest whites to reflect heat
 - Blackest blacks to absorb heat
- Available in white/black and black, all standard widths
