

Coex & Monolayer Films

Cadillac Products Packaging Company Engineered Solutions

Coex Film

Coex and Monolayer Films

Cadillac Products Packaging Company is known throughout the converting industry as a premier manufacturer of laminating-grade barrier and non-barrier coex and monolayer films. As converters ourselves, we understand the film properties required to meet even the most demanding barrier specifications. And now, with the addition of a state-of-the-art 9 layer blown film line, our sales department, along with our award winning R&D group, will help engineer your most challenging project requirements.

Coex Capabilities

- 9 Layer Hosokawa Alpine Blown coex laminating/forming grade film
- 3 and 5 layer blown coex laminating grade films
- Combinations of LLD, LD, HD, EVA, PP, Lonomer and EMAA and more
- Barrier layers of EVOH or nylon
- Layflat widths to 60"
- Gauge .001" to .008"
- 3" or 6" cores
- Maximum roll OD 39"
- Full treat capabilities

Surlyn and Nucrel are registered trademarks of DuPont™
