Cadillac Products Packaging Company Engineered Solutions

Cadillac Products Packaging Company is a full-service manufacturer of coextruded and monolayer blown films, cast films and flexible packaging laminations. Our longevity and growth can be attributed to a strong focus on continuous improvement in quality, service, technical innovation, graphic excellence and cost efficiency.

Since 1942, our commitment to the flexible packaging industry has been acknowledged and rewarded. We have been recognized by the Flexible Packaging Association, the World Packaging Organization, the US Government and by our industry partners.

As an industry leader in research and product development, our range of products and capabilities has grown to include most major markets and packaging segments. Our two dedicated manufacturing facilities keep us in our industry's forefront in all film and flexible packaging applications.

We recently acquired a 9 layer coex blown film line. This state-of-the-art line enables us to provide our customers with the highest quality blown film for laminating or forming. Our award winning R&D group will work with you to find the best barrier and strength solutions for your packaging needs.

We invite you to browse our web site and learn more about Cadillac Products Packaging Company and how we can help you solve your next flexible packaging opportunity.
