5 Layer Blown Films

**5 Layer Blown Films**

Cadillac Products Packaging Company manufactures Monolayer Film, 3- Layer Coextruded Films and 5-layer Coextruded Films utilizing the Blown Film process. Our award winning R&D department can help you create the perfect combination of resins and polymers for even the toughest requirements.

**5 Layer Coextruded Barrier Films**

- 5 separate extruders provide any
- ABCDE combination
- Processing Resins such as: HDPE, LLDPE, Bynel, EVA, Surlyn® and Nylon, ULLDPE, EVOH
- Widths available:
  - Non-Barrier up to 60" layflat
  - Barrier (nylon, EVOH) up to 56" lay flat
- Gauges from 1.0 mil (25 microns) to 7.0 mil (175 microns)
- 3" or 6" cores
- Roll O.D.'s up to 39"

**Processing Resins:**

- Nylon 6, Nylon 66
- EVOH
- LLDPE - butene, hexene, octene, metallocene
- LDPE – fractional melts, high melts, clarity grades
- Polypropylene
- EVA
- EAA
- Ionomers

**Processing Additives:**

- UVI
- VCI
- Colors
- Antistat
- Antiblock
- Slip
- Corona treatment
