Cadillac Products Packaging Company Engineered Solutions

Food/HRI Food Service

Food/HRI Food Service

Over the past 65 years, Cadillac Products Packaging Company has developed and supplied many new/innovative flexible packaging alternatives to the Food industry. Our focus on barrier applications has driven us to be a leader in food packaging technology. Our products cover a broad spectrum of market segments.

Our ability to engineer and manufacture custom films, in-house, allows us to develop and supply unique flexible packaging solutions for many food applications. We are confident that our Food Packaging Team can deliver a successful packaging solution to you.

Meat- Food Service/HRI

From biodegradable to ultra-high strength barrier films, we can cover any specialized application you have.

Coffee- We produce everything from biodegradable laminations to high-barrier, bulk pre-made pouches.

Dairy & Organic- As an IMS listed flexible packaging company, We engineer and manufacture films that are used on every facet of dairy packaging. - Our family of films and laminations are exclusively printed and laminated with water-based materials that complement our full line of biodegradable plastic films.
