

Green/Sustainable Packaging

Cadillac Products Packaging Company

Engineered Solutions

Green/Sustainable Packaging

Cadillac Products Packaging Company's leadership guides the sustainable, strategic focus initiated over 20 years ago. As the company looks toward the future, Cadillac Products will continue to evaluate many new, emerging technologies derived from renewable resources such as biodegradable plastic polymers and recycled materials. Cadillac Products Packaging Company is very proud of a long history of accomplishments and will always keep environmental sustainability as a principal mission.

Waterbased Inks & Adhesives- CPPC exclusively uses waterbased technology in the manufacturing of our products. We emit no harmful gases or emissions which are common in our industry.

Biodegradable Films and Laminations- Our Product Development group has engineered a family of biodegradable products. We can evaluate your current package and recommend a biodegradable alternative.

Environmental Focus- In an industry where it is common to use harmful chemicals and processes, CPPC is dedicated to providing "earth-friendly" alternatives to traditional methods.

Green/Sustainable Packaging

- Active member of the Organic Trade Association
- AIB superior
- IMS Listed
