

Laminations

Cadillac Products Packaging Company Engineered Solutions

Flexible Laminations

Cadillac Products Packaging Company is an innovative leader in multi-layer, flexible film structures designed to optimize packaging performance for a variety of commercial and industrial applications.

In order to meet the performance and critical applications needs of our customers we offer both adhesive and extrusion laminations. We work with all customers to completely understand their requirements with regards to sealing performance, packaging line speeds, product shelf life and other mechanical/barrier properties.

Materials Processed include:

OPP, PET, BON, foil, cellophane, metalized films, barrier & non-barrier sealant films & paper
