Cadillac Products Packaging Company Engineered Solutions

Medical

Cadillac Products Packaging Company is a long-established producer of flexible packaging for Medical applications. For over 20 years, we have manufactured barrier laminations and films that meet or exceed the high-standards Medical Device packaging requires. Our industry leading quality, coupled with our market knowledge, is the foundation for the medical market.

Product Development- Cadillac Products Packaging Company's dedicated development team has the knowledge and ability to design and manufacture all types of medical flexible packaging.

Industry Leading Quality- Our high quality standards and manufacturing practices are the foundation of our success in medical applications. Metrics are twice as good as industry standards.

Engineered Films and Laminations- Our films and laminations are engineered specifically to meet the high demands of medical packaging. CPPC has the capability to produce many high strength barrier films and structures that can be tailored to specific requirements.
