Pre Preg/Composites Release Films

**Release Films – Pre-Preg/Composites**

For over 40 years CPPC has produced a wide variety of composite and Pre-preg release films to meet the most demanding specifications. We have a variety of patterns available to match any release requirements you may have. We can formulate custom films using specialty resins with additives that provide protection and a clean release from any of your Pre-pregs.

**Common Pre-Preg composite industries include:**

- Aerospace/Aircraft
- Industrial
- Electrical
- Recreational
- Marine
- Medical

Release Films can be coated or uncoated and formulated using a wide variety of specialized additives. Films are available in numerous emboss patterns designed for perfect release from any substrate.

**Common Release Film applications include:**

- Carbon Fiber
- Fiberglass
- Aramids
- Boron
- Polyester
- Combinations

Custom Blended Cast Films for Rubber Calendering and Pre-Preg Composites requiring properties such as:

- Excellent/High release
- High temperature resistance
- Prime Raw Materials
- 100% Recyclable
- Excellent Roll Profile
- UV
- Antistatic
- Flame retardant
- Zero contamination
