

Cadillac Products Packaging Company Engineered Solutions

Release Films

Cadillac Products Packaging Company produces a broad range of industry-leading cast embossed films and smooth blown release films. We know critical release applications like Rubber Calendering and Pre-Preg Composites demand superior film performance. We can custom blend an assortment of resins such as LDPE, MDPE, LLDPE, EVA, ULLDPE and Fractional to meet the specific requirements of each of our customers. We have in-line gauge monitoring for excellent roll profile.

Our cast films are available in a wide variety of custom colors and in numerous embossed patterns including taffeta, diamond and matte. Rolls can be manufactured with outside dimensions (O.D.) of up to 30" on 3" cores. With finished widths from 3" to 87" and gauges from 1 mil to 20 mil, these films can be used for a variety of industrial applications or easily converted into products such as table covers and skirts, hospital gowns and bibs.

Release Films

Custom Blended Cast Films for Rubber Calendering and Pre-Preg Composites requiring properties such as:

- Excellent/High release
- High temperature resistance
- Prime Raw Materials
- 100% Recyclable
- Excellent Roll Profile
- UV
- Antistatic
- Flame retardant
- Zero contamination
