Rubber Release Films

Rubber Release Films

As an industry pioneer in coextruded and monolayer separator films for the rubber and associated industries, we offer a wide variety of embossed patterns, gauges, embossed depths, colors and widths. Our specialized additives, resins and emboss patterns deliver the protection you need with the release you want.

Common rubber release industries include:

- Tires
- Retreads
- Hoses
- Belts
- Mats

Release Films can be coated or uncoated and formulated using a wide variety of specialized additives. Films are available in numerous emboss patterns designed for perfect release from any substrate.

Production methods include:

- Cast embossed
- Coextruded
- Laminations
- Blown Film

Resin blends include:

- LDPE, MDPE, HDPE, and copolymers
- Custom formulations with release additives to replace coatings

Custom Blended Cast and Blown Films for Rubber Calendering and Pre-Preg Composites requiring properties such as:

- Excellent/High release
- High temperature resistance
- Prime Raw Materials
- 100% Recyclable
- Excellent Roll Profile
- UV
- Antistatic
- Flame retardant
- Zero contamination
